Algoritmi paraleli/distribuiti in
domeniul graficii de sinteza si al
prelucrarilor de imagini

Parallel/distributed algorithms in the field of image synthesis and
image processing

S_JEP 07101/94

-1996-

Cuprins

1. Elemente introductive in calculul paralel/distribuit	3
An Introduction in parallel/distributed computing	
1.1. Clasificarea sistemelor de calcul paralele	4
Parallel systems classification	
1.2. Modele de calcul si masuri de complexitate	7
Models of computation and complexity measures	
1.2.1. Reprezentarea algoritmilor paraleli prin grafuri orientate aciclice (DAG)	7
Representing parallel algorithms by directed acyclic graphs	
1.2.2. Masuri de complexitate	9
Complexity measures	
1.3. Consideratii asupra comunicatiilor in sistemele paralele si distribuite	17
Aspects concerning communications in parallel/ distributed systems	
1.3.1. Generalitati	17
1.3.2. Controlul legaturii de date	20
Data link control	
1.3.3. Rutarea	21
Routing	
1.3.4. Topologii de retea	22
Network topologies	
1.3.5. Relatia dintre gradul de concurenta si comunicatii	27
The connection between the degree of concurrency and communications	
1.4. Sincronizarea in sistemele paralele/distribuite ...	29
Synchronization in parallel/distributed systems	
1.4.1. Algoritmi de sincronizare globala	30
Global synchronization algorithms	
1.4.2. Sincronizare locala	30
Local synchronization	
2. Arhitecturi paralele utilizate in grafica de sinteza sau in prelucrari de imagini	33
Parallel architectures used in image synthesis and image processing	
2.1. Arhitectura WARP	33
WARP architecture	
2.2. Arhitectura PixelPlane	38
PixelPlane architecture	
2.3. Arhitectura Disputer	41
Disputer architecture	
2.4. Arhitecturi piramidale	44
Pyramide type architectures	
3. Algoritmi pentru sinteza realista de imagini 3D	46
Algorithms for 3D realistic image synthesis	
3.1. Algoritmi de vizualizare realista in sistemul EXPERTS (ascunderea de linii scan-line)	46
Hidden line removal in EXPERTS system	
3.2. Algoritmi pentru sinteza de imagini pe arhitecturi masiv paralele	51

Image synthesis algorithms for massive parallel architectures	
3.2.1. Adaptarea algoritmilor conductei standard de vizualizare pe o arhitectura paralela de tip CM	54
Adjusting the standard graphics pipeline algorithms for a "Connection Machine style" parallel architecture	
3.2.2. Algoritmi de drum optic	57
Ray tracing algorithms	
3.3. Un algoritm paralel pentru sinteza realista de imagini bazat pe subdiviziunea adaptiva a spatiului	58
A parallel realistic image synthesis algorithm based on adaptive spatial subdivision	
3.3.1. Analiza de cost a algoritmului	61
Algorithm analysis	
3.4. Algoritm de vizualizare a unui model de geometrie solida constructiva	63
Visualization of a CSG model	
3.5. Algoritm paralel pentru determinarea infasuratorii convexe a unei colectii de puncte in plan	66
A parallel algorithm for 2D convex hull	
3.6. Un mod de proiectare a aplicatiilor paralele in domeniul graficii	69
A unified model to develop parallel applications in the field of computer graphics	
3.7. Implementarea sub S.O. Unix a unui algoritm paralel pentru decuparea fata de un contur poligonal	78
A parallel algorithm (source) for polygonal clipping under a UNIX environment	
4. Algoritmi paraleli/distribuiti in domeniul prelucrarilor de imagini	83
Parallel/distributed algorithms for image processing	
4.1. Metoda Khan pentru segmentarea imaginilor	83
Khan's segmentation method	
4.2. Un algoritm paralel pentru identificare si localizare de contururi	85
A parallel algorithm for contour identification	
4.3. Algoritmi utilizati in etichetarea imaginilor. (Algoritmi de relaxare)	89
Algorithms for image labeling	
4.3.1. Aplicatii ale etichetarilor imaginilor	94
Applications of image labelling	
4.4. Algoritmi pentru prelucrari de imagini realizati pe arhitectura WARP	98
Parallel algorithms for image processing on a WARP architecture
